

GOOD PRACTICES 85: July 2026

INCLUSIVE AGRICULTURAL MARKETING THROUGH FARMERS' MARKET INITIATIVE IN MEGHALAYA

In this Good Practice Note, C. S. Shabong and Gavin Shullai reflect on the organisation of six editions of the farmers' market in Meghalaya organised during January to June 2026.

CONTEXT

The Government of Meghalaya is working towards building a more resilient and self-sufficient agricultural economy and improving market access. The Farmers' Market initiative, organised by 1917 [iTEAMS](#) under the [Department of Agriculture & Farmers' Welfare, Government of Meghalaya](#), and supported by the [Meghalaya Farmers' \(Empowerment\) Commission](#), is a flagship platform that empowers local farmers and entrepreneurs by connecting them directly with consumers. Since its conception in January 2026, the market has evolved into a vibrant urban hub that celebrates Meghalaya's agricultural richness and diversity, artisan creativity, and community spirit.

Each edition brings together farmers, cooperatives, startups, and beneficiaries from various government departments on a common platform, offering farm-fresh seasonal produce, value-added produce, and innovative processed products. By eliminating intermediaries, ensuring fair pricing, and promoting sustainable farm-fresh local produce, the Farmers' Market (Box 1) stands as a replicable model of inclusive agricultural marketing. It is not merely a marketplace—it is a movement that strengthens urban–rural linkages, uplifts farmer incomes, and positions Meghalaya as a leader in innovative agro-tourism and community-driven development.

Overview of the Farmers' Market

Box 1: Farmers' Market

This initiative uses a government department's empty parking lot on Saturdays, usually a holiday, transforming it into a 1-day monthly farmers' market. After the event, the lot is cleaned and restored. By June 2026, six markets have been held, attracting a diverse range of farmers, cooperatives, government departments, and entrepreneurs. The space can accommodate 38 stalls, which are allocated directly by ITEAMS staff by phone. Farmers are not allotted stalls consecutively each month, ensuring equal opportunity for all.

Key participant categories include:

Individual Farmers who brought fresh seasonal produce such as vegetables, fruits, rice, honey, and spices.

Cooperatives & Farmer Groups: Meghalaya State Rural Livelihood Society (MSRLS); Meghalaya Basin Management Agency (MBMA); Integrated Village Co-operative Societies (IVCS) units showcasing collective produce such as bay leaf, honey, turmeric, jams, handicrafts, and millet-based products.

Beneficiaries of Programmes implemented by Government Departments such as

-Directorate of Fisheries: Fresh and smoked fish stalls, permanent outlets.

-Animal Husbandry & Veterinary: Dairy products (curd, paneer, lassi, pudding).

-Arts & Culture: Handicrafts, blacksmith items, and cultural showcases.

Entrepreneurs & Startups:

-Hydroponic farmers (lettuce, kale, cherry tomatoes).

-Processed food innovators (pickles, chutneys, millet snacks).

-Fruit wine makers (pineapple, banana, rice-based wines).

-SOMOI, an online delivery app integrating digital sales with physical stalls.

Van Dhan Vikas Kendras (VDVKs) organise curated live kitchens featuring themed menus (orange & pumpkin in Jan; pepper & strawberry in Feb; banana & sesame in March), which help visitors experience local produce in creative cuisines.

GOOD PRACTICES**Direct-to-Consumer Sales**

The initiative allows farmers to sell directly to consumers without intermediaries, helping growers secure better returns while giving buyers access to fresh, locally produced food. Consumers can buy fresh produce directly from farmers at fair prices. Processed goods (fruit wines, jams, pickles, millet snacks) showcased innovation and higher-margin opportunities. Hydroponic and organic farmers educated consumers about sustainable farming and healthy living.

Farmers consistently reported higher earnings compared to traditional markets. For instance, Mustard leaves are sold at ₹50 per bundle, whereas they are sold for ₹10 in local markets. The same is the case with pumpkins, which fetched ₹100–120, while farmers have to sell them at ₹20–50 to local intermediaries.

Farmers and vendors displaying fresh leafy greens, packaged millet products, jams, and processed food items

Cultural Integration

The market also engages Local Music Artists through grassroots music performances funded by the Chief Minister Grassroots Music Program (CMGMP). The Chief Minister's Meghalaya Grassroots Music Program (CMGMP) is a ₹69 crore government initiative supporting over 7,000 local artists. It provides a platform through permanent fixed venues and offers music theory training, access to production equipment, and global digital exposure to strengthen the state's creative economy. Grassroots musicians (CM-MGMP) and artisans thus enriched the market, making it more than just a trading space.

Artists from the Chief Minister's Meghalaya Grassroots Music Program (MGMP) performing live at the event.

Digital Innovation

SOMOI is a local online delivery platform that has successfully integrated with the Farmers' Market initiative in Meghalaya. Its participation has transformed the market into a hybrid physical–digital ecosystem, enabling farmers and entrepreneurs to reach customers both on-site and remotely. By combining real-time app listings, on-ground delivery agents, and digital visibility, SOMOI has become a vital partner in modernising the Farmers' Market experience.

Table 1: Benefits for Farmers

Benefit Area	Description	Impact
Instant Market-to-Home Delivery	SOMOI's riders stationed at the venue deliver produce directly to customers' homes.	Farmers can sell to both walk-in and online buyers simultaneously, increasing total sales volume.
Expanded Customer Reach	Products are listed on SOMOI's live app section, visible to users across Shillong.	Farmers gain exposure beyond the physical market, attracting new customers and repeat orders.
Reduced Logistics Burden	SOMOI handles packaging and delivery logistics.	Farmers save time and cost, focusing on production and customer interaction.
Brand Visibility	Farmers' names and products appear on a digital platform.	Builds trust and recognition for local producers and cooperatives.
Data & Insights	SOMOI tracks popular products and customer preferences.	Farmers receive valuable feedback for planning future crops and pricing strategies.

Community Spirit and Bonding

The Farmers' Market has consistently gone beyond being a transactional space—it has become a community gathering hub. By bringing together farmers, entrepreneurs, government departments, and residents, the event nurtures a sense of shared purpose and pride in Meghalaya's agricultural heritage. Farmers from remote villages interacted directly with urban consumers, strengthening trust and appreciation for local produce. Young entrepreneurs, women-led cooperatives, and grassroots artisans showcased their work alongside traditional farmers, creating a diverse and inclusive environment. Families, students, and tourists engaged in shopping, tasting, and cultural activities together, reinforcing

social bonds across age groups and communities.

Carnival-like Atmosphere

The market was designed to create a festive atmosphere for customers and buyers, transforming routine shopping into a celebration of food, culture, music, and community. These include:

- *Live Kitchens by VDVks*: Curated menus featuring seasonal produce (pumpkin, strawberry, banana, sesame) allowed visitors to taste innovative local cuisines.
- *Grassroots Music & Performances*: Acoustic sets and CM-MGMP musicians created a lively backdrop, encouraging visitors to linger and enjoy the ambience.
- *Artisan & Craft Stalls*: Blacksmiths, floriculture entrepreneurs, and handicraft makers added variety, making the market feel like a cultural fair.
- *Family-Friendly Additions*: Activities like floriculture stalls and even a bouncy castle (in later editions) ensured children and adults alike had reasons to stay and enjoy.

Artisans demonstrating and displaying traditional handicrafts including bamboo baskets and decorative items at the market

Attraction for Locals and Tourists

The Farmers' Market successfully positioned itself as both a local necessity and a tourist attraction: Residents from nearby colonies visited on foot, carrying traditional *Pla lew* (cloth bags) to reinforce cultural identity. Tourists were drawn by the festive atmosphere, unique products (fruit wines, organic produce, handicrafts), and opportunities to experience Meghalaya's culture firsthand. Students, professionals, homemakers, and elderly citizens all found value—whether through affordable fresh produce, cultural performances, or artisan goods. On average, around 500-800 people visit each edition.

BENEFITS AND OUTCOMES

Beyond the invaluable exposure and networking opportunities that have broadened their market understanding and strengthened their connections, the initiative has delivered significant financial gains, enabling farmers to earn higher margins and achieve consistent sales. This dual impact has not only improved their livelihoods but also motivated them to increase production, diversify their offerings, and engage more confidently in future market editions—creating a sustainable cycle of growth and empowerment within the farming community.

Lawshtun Veggies stall at the market displaying naturally grown vegetables

Farmers consistently reported higher earnings compared to traditional village markets, largely due to direct-to-consumer sales and fair pricing mechanisms. While a few vendors sold their produce at the same rates offered to middlemen, they still experienced a complete 'sold-out' outcome, reflecting strong consumer demand and improved visibility. Farmers selling organic or niche products (wine, hydroponics, mushrooms) achieved good margins. Farmers consistently reported 3–5x higher margins compared to village markets. Farmers reported customers returning for specific products, creating sustainable demand. Travelling Allowance ranging from 200/- to 2000/- depending on the distance travelled by the farmer is supported by the organisers to reduce operational costs, thereby further boosting farmers' net profitability.

Some of the feedback received from market functionaries and visitors (Verbatim) are given below.

- *“Mustard leaves were sold at ₹15–20 per bundle compared to ₹5 in local markets. This platform is a blessing.” — Pynhunlang Mynsong*
- *“We want this market twice a month. It helps us earn more and meet new customers.” — Tipsuk Pohshna*
- *“The market was very essential for processed products as compared to local markets. It gave us exposure.” — Jingkyrmen VDK*

- *“This initiative genuinely supports and uplifts the vendor community.” — March 2026 Vendor Feedback*
- *“Fruit wine converts seasonal surpluses into higher-value products. We sold everything.” — Khasi Wines*

Edition-wise Revenue Turnover

Each edition of the Farmers’ Market welcomed new farmer participants, introducing fresh and often rare varieties of vegetables that offered visitors a unique opportunity to experience the diverse local produce of different regions. The iTEAMs personnel collected data by counting the number of visitors visiting the market on each market day. To generate turnover data, the personnel collected it from each farmer through a questionnaire at the close of the market day. The revenue figures reported remain approximate, as not all participants were willing to disclose their daily earnings. Therefore, the data are close to realistic and are not merely rough estimates (Table 1).

Table 1. Edition-wise Visitors & Estimated Turnover (January to June 2026)

Edition	Date	Visitors	Estimated Turnover (₹)
1 st	24 Jan 2026	~550	₹ 3.5–4.5 Lakh
2 nd	22 Feb 2026	~789	₹ 5–6.5 Lakh
3 rd	21 Mar 2026	~560	₹ 4.5–6 Lakh
4 th	18 Apr 2026	~536	₹ 4–5.5 Lakh
5 th	23 May 2026	~880	₹ 6–7.5 Lakh
6 th	13 Jun 2026	~736	₹ 5–6.5 Lakh
Total		~5000+	28.36Lakhs

Every edition has about 550-880 visitors, and across all editions, the total turnover was around 28-36 Lakhs. Top earners gained about 15000-28000 INR per edition. The top-selling products include mustard leaves, fruit wines, organic lettuce and mushrooms, pickles, and millet snacks. While high-performing vendors earned between ₹15,000–₹23,000 per edition, moderate-performing vendors and small-scale vendors earned better, ₹4,000–₹9,000 and ₹1,500–₹3,000 respectively.

Hybrid sales through association with SOMOI app

SOMOI app-enabled hybrid sales (on-site + online), expanding reach and convenience for buyers and customers. Farmers gained visibility and new business leads through digital integration. The association with SOMOI has redefined the Farmers’ Market model, bridging the gap between traditional commerce and digital convenience. It has empowered farmers to sell more efficiently, expanded consumer access to fresh local produce, and modernised the market’s operations.

Table 2: Benefits from association with SOMOI app

Indicators	Result (Jan–Jun 2026)
Total deliveries via SOMOI	15+ per event
Average delivery charge	₹30 (free above ₹399)
Farmers onboarded	20+
Products listed	50+ (vegetables, honey, pickles, dairy, millet snacks)
Estimated additional revenue	₹40,000–₹60,000 per edition

Feedback Received on SOMOI (Verbatim)

- *“SOMOI has been very helpful to us and all vendors. It’s a great platform for collaboration and growth.”*
- *“We are happy to share that we have onboarded Country Spice Shillong, Tynrai, Open Up Eats, and many more vendors.”*
- *“The market has truly helped us build strong connections and expand our reach.”*

SOMOI thus stands as a “last-mile enabler”—a partner that connects farmers and consumers seamlessly, ensuring that Meghalaya’s agricultural ecosystem remains vibrant, inclusive, and future-ready. It also introduces digital accessibility to a traditional market, appealing to younger, tech-savvy consumers. Moreover, the live app features highlight farmer stories and seasonal specials, reinforcing cultural value. Two-wheelers used for short-distance deliveries reduce the carbon footprint compared to larger vehicles.

CHALLENGES

Though the organisers didn’t face any challenges in organising this event, the farmers’ market addressed many of the challenges farmers face. In regular markets, organic vegetable producers are often forced to sell at the same price as those produced with agrochemicals. At the Farmers Market, consumers specifically come looking for fresh, local, and organic produce. This allows organic farmers to sell at a fair price that reflects the cost of cultivation, without undercutting. It also serves as a launchpad for farmers and entrepreneurs seeking opportunities to introduce new and speciality products that were previously not easily accessible to consumers. Through digital initiatives like SOMOI, small vendors who participate in the physical market have also gained visibility online. This has translated into direct inquiries, orders, and business leads beyond market days.

The market encourages farmers to diversify beyond traditional staples. For instance, one farmer introduced millets and fruits that were not commonly sold before. As a result of her visibility in the market, she secured supply leads from multiple shops across Shillong city. This shows how the market acts as a B2B connector, not just a B2C one. The market is not limited to agriculture. The farmer market also provides space for local artisans to showcase and sell traditional crafts. Products like handwoven baskets, traditional knives, and other handmade items get visibility among urban consumers who value local craftsmanship.

SUSTAINABILITY AND SCALING UP

Post-event discussions revealed that the Farmers' Market not only enhanced sales performance but also generated a handsome turnover, underscoring its role as a catalyst for both financial growth and motivation to scale production. Farmers expressed gratitude for exposure, fair pricing, and complete sales. Many requested more frequent markets (twice a month) and larger stall sizes.

Currently, the organisers have not taken any decision on scaling up this initiative to other locations or expanding the scope and size of the market due to budgetary constraints and the immediate priority to bring down the operational costs from 5.27 lakhs to 2.5 lakhs per market event, which the government bears. The government is trying to minimise overheads to the optimum to sustain this market in the future. However, at year-end, an evaluation exercise will be undertaken to review and plan a future roadmap.

Customers leaving the market with bags of fresh vegetables

CONCLUSION

The Farmers' Market initiative has emerged as a transformative model for economic empowerment, community engagement, and sustainable development in Meghalaya. Over six successful editions, it has generated an estimated ₹28–36 lakh in total turnover, directly benefiting more than 75 farmers and cooperatives. It has proven that when farmers, entrepreneurs, and citizens come together, they create not just a marketplace—but a movement that strengthens livelihoods, promotes sustainability, and celebrates identity. The Farmers' Market stands today as a replicable model of inclusive growth, blending tradition with innovation. Its continuation will ensure that Meghalaya's farmers remain at the heart of the state's economic and cultural narrative—empowered, visible, and celebrated.

Canning S Shabong, B.Sc Agri (Hons), MBA (Mkt), is a retired Director of Agriculture (R&T), Meghalaya, with over 35 years of field and administrative experience in areas ranging from Agriculture Marketing, Agriculture Information, and Information Technology. Currently, he is serving as Executive Adviser, Meghalaya Farmers Empowerment Commission, Government of Meghalaya. He can be reached at csshabong@gmail.com
